

## B-HDS

### CHARACTERISTICS

SDS-plus drill bits. High quality.

3 canals squared spiral that speed up the expulsion of the generated residues.

High performance carbide plate with auto-centering bit.

Auto-centering bit makes the drill easier and high precision, allowing safer and accurate beginning.

Carbide bit is steel rebar contact resistant.

Reinforced drill bit to resist compression, torsion and bending loads generated while drilling

Wide range of diameters and lengths available.

Suitable for concrete, reinforced concrete and granite even drilling in masonry, stone, etc.

### BASE MATERIAL

## 1. RANGE

### 1.1 B-HDS

SDS-plus drill bits. High quality.

#### Technical data

CODE	Diameter [mm]	Length [mm]
